Welcome to our 9th Annual Sale

We would like to welcome you again to the 9th Annual Hardgrass Bull Sale. For those of you who have been coming all along we thank you for your continued support, your faith in our programs doesn't go unnoticed. For those of you who are new, we all come from generations of ranching in the Specials Areas. The Special Areas puts many different selection pressures on cattle. They must be able to travel a long way to water (especially the last 2 years) raise a strong calf, breed back on time, and do this efficiently for as long as possible. As you will see from the cow pictures in this catalogue our cows are in their working clothes. They work for us, not the other way around. Foot, udder, fertility, temperament problems and anything else that shows up are continually weeded out in every herd.

The bulls wintered at Saddleridge Feedlot in Rosemary under the watchful eye of Leonard Retzlaff. We fed them a backgrounder/grower ration targeting 2.2 lbs/day gain which they handily outperformed and gained well above the target. As we continue to heavily select for do-ability in our cows we are seeing the outcome in the feedlot performance and fleshing ability on our bulls. With pasture and water options limited this summer the Peake and the R&W bulls stayed at the feedlot on a maintenance ration, while WCC and the Flying U bulls went home to pasture.

This set of fancy bred heifers on offer here are something we are particularly pleased with, these are mostly all home raised heifers with a few additions from Marilyn Armstrong, and Scott Peake herds.

We are extremely proud of the progress we have made with our cows and invite anyone to come see them anytime.

The Hardgrass Team

Cavalry was purchased from Stevenson Angus in Montana fall of 2019. He has shown to have extremely consistent calving ease and low to moderate birthweights in his progeny. He is a very efficient easy keeper with plenty of length and thickness. He has a tremendous gap in his growth EPDs that he passes on to his offspring, as well as his quiet easy going nature.

This Rainfall son's dam was purchased from the Johnson Livestock Dispersal in Dec. 2020, she was designated Elite in 2016. I selected her for her sound structure and excellent feet as a then 12-year-old cow. This Rainfall bull calf was the best heat detector at AI time as he was always with the bulling cows, he is sound made and ready to breed cows.

Here is a soggy heifer bull out of the Tiger son I purchased from R&W Cattle in 2018. He has sired a nice set of calves with eye appeal and growth, weaning weights on his sons averages 677 lbs. Calved the first daughter this year and she is a very nice female. I retained a maternal half-brother for use on heifers, he is one of the service sires on the heifers that sell today.

BLACK & RED BRED HEIFERS
SELL IMMEDIATELY FOLLOWING THE BULLS

The Bull Breeding Soundness Evaluation

More than just a date with a probe . . .

The WHO?

Breeding soundness examinations should be performed on all bulls to be used for breeding.

The WHY?

Economics... When comparing heritable traits, fertility is 10 times as important as carcass quality and 5 times as important as rate of gain. Although female fertility is important, the herd sire bears the majority of the herd's fertility responsibility – the law of ratios! It is estimated that 1 out of every 5 bulls is sub-fertile, so avoid the surprise in the fall of open or late cows and get those bulls tested.

The HOW?

Libido and serving capacity are UNASSESSED in the routine breeding soundness exam!!! It is important for producers to monitor breeding activity when the bull is put with cycling females

Palpation of both testicles is essential; the testicles should be firm, move freely within the scrotum and there should be no irregular swellings. The scrotum is also examined for any injuries (for example, frost bite) and excess fat deposits that can affect thermoregulation. The ideal scrotal shape is pendulous with a definite neck (smaller testicles and excess fat usually alter scrotal shape). There is a reason why scrotal circumference measurements are performed!! Scrotal circumference measurements are highly correlated to testis weight, daily sperm production and high semen quality traits. Larger scrotal circumferences in bulls are associated with earlier age at puberty in heifers. See, size does matter!!! Transrectal internal examination focuses on accessory sex glands and inguinal rings. Enlarged sex glands can be a sign of inflammation with secondary infection.

Semen quality is a big focus of the exam. Ejaculate volume, semen density and motility (gross and individual) and sperm morphology are all evaluated. Density and motility are assessed using a microscope. There is power in sperm numbers and if the sperm are not moving well, they will not make it to fertilize the egg! Individual sperm are examined under a higher magnification on a stained slide for abnormalities.

Sperm Abnormalities... The easiest way to understand this is to think of an individual sperm in sections. Abnormalities can affect each section of the sperm – the head, the midpiece, the tail (principle piece) and the acrosome (top part of the head). There can also be 'broken sperm' with the head separated or detached and droplets that are usually lost from the sperm can still be present. Sperm abnormalities are usually classified as either Primary or Secondary and are based on where the defect originates during spermatogenesis.

It is important to remember that Spermatogenesis is an ONGOING thing! Sperm are constantly being produced in a continuous cycle. The causes of disturbing spermatogenesis are usually heat or stress related (less common causes are genetic, toxic and nutritional deficiencies). Both heat and stress lower levels of testosterone which affects sperm production.

The WHEN?

Weather can have an effect on a breeding soundness exam. Warmer days are always better because there is less chance for false negatives from environmental effects. Sperm can get 'shocked' on a cold day and motility can be greatly decreased. Since annual vaccines are commonly administered to bulls at the time of semen testing, it is good to test about 3 to 4 weeks before breeding season.

The WHAT?

Bulls that are classified as SATISFACTORY potential breeders mean they have met all of the minimum requirements for physical soundness and semen quality – remember, watch for sex drive and mating ability!! QUESTIONABLE bulls would most likely impregnate cows but fertility is expected to be slightly below normal or there is a risk of transmitting undesirable traits to offspring. The DECISION DEFERRED classification is usually given to pubertal bulls with poor semen quality because at sexual maturity semen quality should improve. It is also used in mature bulls that have suffered a disturbance in spermatogenesis, such as frost bite damage, which should recover before the breeding season. UNSATISFACTORY is given to bulls that are expected to result in poor fertility in the cow herd.

* * * *

It is always important to remember that when doing a breeding soundness exam, we use a 'snapshot in time' to evaluate a continuous 'motion movie picture'. Spermatogenesis is constantly happening and bulls are subjected to numerous things on a daily basis that can affect this. Just because your toe doesn't hurt today, doesn't mean you won't stub it on the tractor tomorrow . . .

BRED COMMERCIAL FEMALES

Our environment and our management puts an immense amount of selection pressure on our cow herds so buy with confidence knowing these heifers will know how to go out and go to work for you.

PEAKE RANCHING

Peake Ranching is pleased to offer this fancy set of home raised heifers. They are registered heifers but will be selling as commercial. A huge emphasis has been put on the cow herd for maternal traits, with a strict cull based on feet, udders and especially docility. These heifers will be moderate framed and have been very easy fleshing. They are on a full herd health vaccine program and were exposed 70 days to the following bulls:

- 66 Black Cedar 24E - 80 lbs.
- Peake Cavalry 108 - 76 lbs.
- Peake Cavalry 1012 - 75 lbs.
- Peake Cavalry 1020 - 76 lbs.

R&W CATTLE CO.

This is a fancy set of home raised black heifer, with a handful of top cut purchased from Marilyn Armstrong. Covered by R&W bulls with individual birth weights ranging from 70-80 lbs, turned out July 11th to August 17th for a 37 day breeding period. We calved a bunch of the big sisters last spring and were extremely pleased with mothering ability, udder quality and over all performance. Very few of their calves didn't get on the truck this fall with the rest of the steers. These heifers come from working ranch cows and will not disappoint. Do not hesitate to come see these girls at home before sale day.

SELLING 50 HEAD

WADE CATTLE CO.

This is a fancy set of F1 and Angus heifers that were purchased from Scott Peake, he has been a long-time supporter of our program purchasing bulls and females. The F1 females are all sired by DW Standard 1A 4F purchased from DW Herefords in Hussar. These are a very nice set of heifers that are ready to go to work, Scott's cow herd consistently weans 600 lb. steers in October. We have previously calved heifers from Scott Peake's herd and are in close contact with this herd at calving, branding, weaning and preg-check, Scott runs a tight ship!

They were bred for a tight calving window with only a 30-day exposure that started on July 5th. Service sires are Bandura Mr Broken Bow 9G (sires BW averages of 75 lbs), WCC Substantial 34H (BW of 70 lbs), WCC Stellar 31J (BW 73 lbs). Heifers received two doses of Express FP5-VL5 pre breeding and Ultrachoice 8 at preg-check. Please feel free to come and see the heifers prior to sale day.

SELLING 23 HEAD

FLYING U CATTLE CO.

Flying U Cattle Company is pleased to offer this fancy set of home raised heifers. They are very quiet, easy fleshing and will have good udders. Bred July 13 to Sept 1, service sire is Red Rebel Creek Hugh Hefner 32H. These heifers will be vaccinated with Cattlemaster and 8 way at preg-checking.

SELLING 10 HEAD

Bred females to be picked up after the sale

Bull Sale

Terms & Conditions

TERMS OF SALE: The terms of the sale are cash or cheque, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance, unless previous arrangements have been made. Every animal sells to the highest bidder and in case of disputes, the auctioneer's decision will be final. We reserve the right to withhold animals from export shipment for whom payments have not been received prior to departure times.

BREEDING GUARANTEE: All purebred cattle are sound and right and sell with a responsible breeder guarantee of satisfaction. In the event of any unlikely dispute, the regular terms and conditions, standard with the Canadian Aberdeen Angus Association, shall apply. The consignors will not, however, provide replacement or adjustment for physical injury or mismanagement. We therefore stress the importance of insurance on bulls. At no time shall the seller's liability exceed the purchase price of any animal.

CATTLE INSPECTION: All carry identity tags, corresponding to Sale Lot Numbers. All shall be available for inspection prior to the sale.

ANNOUNCEMENTS: Errors discovered in the catalog will be corrected from the auction stand at sale time and will take precedence over the printed matter in the catalog.

SIGHT UNSEEN BIDS: May be entrusted in complete confidence to any of the consignors or sale staff listed.

INSURANCE: Ownership risk to purchaser commences when the Auctioneer's hammer falls. Livestock coverage will be available at the clerks desk from representatives on Sale Day.

ALL PERSONS who attend the Sale do so at their own risk, and the owners, Management and Sale Staff assume no liability, legal or otherwise, for property loss or for any accidents that may occur.

Please bring this catalog with you to the Sale

FIREWEED IN DOROTHY 2022

THE OLD DAYS AGAIN

by Arthur Peake - 1866 - 1947 - Pioneer in the Dorothy Area

An Indian looked down on the river
And thought of the days long gone by
When the buffalo roamed there in plenty
Then turned and he said with a sigh:
“The White Man has taken our country
His Fire Cart now runs o’er the plain
Up the creeks and the rivers they are spreading
While I long for the old days again.”

A stockman lived down by the river
And saw the land seekers go by
Says he, “They have got the land hunger
But they’ll find this old spot pretty dry;
And some will pull out of the country
While others experience gain,
Producing a fine crop of taxes
And raising municipal Cain.”

A railroad was built down the valley;
Cheaper coal for the east, was the cry.
Too late to haul wheat in the good years
It can haul the folks out, not it’s dry.
The stockman still lives by the river
Let’s hope he has not stayed in vain
May the grassland come back in the future
For he still lives in hopes to see rain.
